TONY ALBERT

MOTION, EDIT, DESIGN.

Motion designer and graphic designer with 7+ years of turning ideas into visuals. Product films, app explainers, brand reveals and social reels, in every format from 16:9 to vertical.

BEHIND THE CUT

I work across static and motion design: branding, print, digital and animation. I want every piece to look good and to do a clear job, whether that is explaining an app in thirty seconds or making a logo feel alive.

Today I'm a motion designer at Redcrabs Creative Works in Hyderabad, where I also lead projects and guide the design team. I trained in animation and graphic design, and I like collaborating closely and learning something new on every project.
